

October 6, 2016

The state of Iowa has mandated all students entering 7th grade or above, and born on or after September 15, 2000 need an adolescent tetanus, diphtheria and pertussis (whooping cough) booster immunization. This dose must contain the pertussis component to be considered compliant with school entry requirements.

The State of Iowa law states a child cannot attend school without being fully immunized.

Our records will be audited. Please have your child immunized ASAP. You will have 60 days to have this completed.

If your child will be attending college in the near future, they will need their immunizations updated.

Please bring/send a copy of your child's completed immunizations to the school.

Thank you,
Laura Funk RN, BSN
School Nurse
